Statistical Abstract of the United States 2007

Statistical Abstract of the United States: 2007 (126th Edition) Washington, DC, 2005;
<http://www.census.gov/compendia/statab/>

The *Statistical Abstract of the United States* is the standard summary of statistics on the social, political, and economic organization of the United States. This volume includes a selection of data from many statistical sources, both government and private. Publications cited as sources usually contain additional statistical detail and more comprehensive discussions of definitions and concepts. Data not available in publications issued by the contributing agency but obtained from the Internet or unpublished records are identified in the source notes. More information on the subjects covered in the tables so noted may generally be obtained from the source. Although emphasis in the *Statistical Abstract* is primarily given to national data, many tables present data for regions and individual states and a smaller number for metropolitan areas and cities.

Example:

A Cornucopia: How Sweet It Is

- U.S. growers harvested 11 billion bushels of corn on 75.1 million acres of farmland in 2005. About 1.9 billion bushels were exported and 1.6 billion bushels were used for ethanol.
- Per capita consumption of corn sweeteners, including high-fructose syrup, totaled 78.1 pounds in the United States in 2004, up from 35.3 pounds in 1980 but on a downward trend from 81.8 pounds consumed in 2000.
