Subject: Wood stove ordinance proposal

I find it hard to believe that the county is going to impose restrictions on the use of wood burning stoves and fireplaces. I live in Potomac and the primary source of heating my home and shop are a fireplace and a wood burning stove. I am sure that I know who one of the driving forces is on this issue as he lives in Potomac and truly needs a life. I would hope that you would give this proposal a serious review as it will impact people that are financially unable to convert their heating to something more efficient.
