Subject: air quality in county

Greetings,

I wanted to voice my support for stricter air quality regs in the county from reading some of the articles in the paper. I live in the county too, and as far as I know we don't have individual airsheds that end at property lines. We're in this together and I don't want to breathe nasty woodsmoke or have it in the airshed. Plus, it's bad for global warming. The folks who are asking for basically no strengthening of the regs can say it's their right or whatever, but their freedom ends at the tip of my nose (and lungs).

Thanks,

Stacy
