

**Hello to whom it may concern:**

**Please have some compassion for those of us who live out of the City touch.**

**We are not fortunate to have piped in electricity, gas and water  
To fill our heating needs and other needs.**

**Sometimes we do not even have a sheriff to cover our areas because  
They are so busy in Missoula. Why does everyone in Missoula want  
To tell us how to live.**

**I guess you want us to pay 600 a month for our heat instead of using  
Down trees to help us avoid a big propane and or electric bill.**

**With everything that is going on I feel like this is no longer America  
It is just like Red China, where they tell you what you can and can not do.  
No logging, so now our loggers are out of work, no smoking because it  
Is not acceptable to someone else, no bags at the supper market, because  
Someone said it is bad, and NOW NO HEATING with wood burning stoves because  
someone on a committee doesn't like getting smoke in his/her eyes.**

**Sincerely,**

**Miss Sally**
