

NON-DEGRADATION REVIEW APPLICATION

**Purpose of Form: Review of Categorical exempt parcels and
Review of Non-exempt parcels requiring Nitrate Sensitivity
Analysis**

The Montana Department of Environmental Quality requires that drainfields used for septic systems be reviewed for compliance with Section 30.7 of the Administrative Rules of Montana. Parcels not reviewed as part of the subdivision process are required to have it done, either by a private consultant or the Missoula Health Department. If the applicant desires the Department perform the review, the following is required (some of the information may be available at the Health Department):

1. **Name of Applicant:** _____

2. **Property Legal Description:** _____

3. **Size of Lot in Acres:** _____

4. **Depth to Uppermost Aquifer or Bedrock - may be obtained from Well Logs:**

5. **Distance to Nearest Surface Water:** _____

6. **Background Nitrate analysis result of water obtained from a well nearby and representative of the aquifer located under the proposed drainfield.**

Nitrate Test Results: _____

7. **The Soil Texture of the Drainfield area; actual or estimated Percolation Rates:**

Soil Texture: _____

Percolation Rates: _____
